11 Layton Road, Far Hills, NJ 07931

Spring sale: Shrubs, perennials,

Native plants are gaining widespread popularity because of their natural beauty and their ability to withstand most of our region's challenging weather conditions including periods of drought, hot summer temperatures and soggy cool-weather soils. Many more garden centers and nurseries are expanding their selections of native plants and home improvement centers are joining in. Catalog suppliers are also a rich source of native plants.

We urge you to only deal with reputable nurseries and growers who propagate from seed and cutting. Never collect plants from the wild or purchase wild-collected plants, which threaten the existence of native species and ecosystems. Locally grown plants are more likely to assure adaptability to your garden. This list of local suppliers of native plants has been researched and provided by the Somerset/Hunterdon Master Gardeners **Naturalist Team**.
